

PayWise AI Agent

Track: Best Agentic Economy Experience on Arc

Tagline: An AI Agent That Doesn't Just Advise — It Acts.

Problem

Millions of freelancers and remote workers face high fees, slow settlements, and poor transparency in international payments.

Solution

PayWise AI Agent analyzes payment requests, compares routes, explains recommendations, demonstrates stablecoin settlement concepts, and generates receipts.

Circle Products Used

USDC, Circle Wallets, Arc Network, Circle Gateway (Conceptual Integration)

Example User Journey

User requests to send \$500 to Pakistan. The AI compares Bank Wire, Western Union, and USDC settlement, then recommends the most efficient route.

Innovation

Unlike traditional comparison tools, PayWise AI Agent provides reasoning, recommendations, and financial guidance aligned with the Agentic Economy vision.

Future Vision

Autonomous payroll, agent-to-agent payments, multi-country routing, and treasury automation.

Submission Notes

Add your GitHub Repository Link, Demo Video Link, Architecture Diagram, and MVP URL before submission.
